Your All-In-One Simplified SaaS Platform for Securing Workforce and Privileged Access

WALLIX One is a comprehensive SaaS platform designed to secure and streamline digital transformation across two essential areas: Workforce Access and Privileged Access.

Workforce Access focuses on ensuring that every member of your organization can access necessary resources securely and efficiently, while also maintaining the highest standards of security for identity data and credential management.

With **WALLIX One** you can reduce the total cost of ownership, enhance operational agility, and benefit from high-level SLAs, all while driving your business forward.

Additionally, we offer a solution with a hybrid model, allowing you to combine SaaS with on-prem capabilities, providing the flexibility to adopt SaaS at your own pace.

Privileged Access is dedicated to protecting your most critical IT and OT assets by securing and managing privileged accounts, as well as facilitating safe, monitored remote access for third-party collaborations.

PRIVILEGED ACCESS

WALLIX One PAM

Provides agentless Privileged Access Management, ensuring secure oversight of critical IT and OT infrastructure, eliminating hardware needs, and automating software upgrades.

PRIVILEGED ACCESS

WALLIX One Remote Access

Secures and centralizes external access, enhancing control, auditability, and security for businesses relying on third-party providers for remote IT/OT network access

WORKFORCE ACCESS

WALLIX One IDaaS

Streamlines remote authentication for employees and contractors, ensuring secure, smooth access to corporate resources without friction.

WORKFORCE ACCESS

WALLIX One Enterprise Vault

Streamlines remote authentication for employees and contractors, ensuring secure, smooth access to corporate resources without friction.
